

# MOFFITT CANCER CENTER

Moffitt Cancer Center is seeking a junior clinical investigator in the Senior Adult Oncology Program (SAOP). The position involves clinical and translational research in Geriatric Oncology with mentorship from the senior faculty of a leading program in the field, management of cancer in older persons in the SAOP clinic, and teaching of oncology and medicine residents.

With a long history of formally mentoring both physician-scientists and clinical researchers, Moffitt Cancer Center has an extraordinary effort in personalized medicine partnering with the biotechnology/pharmaceutical industry and strong preclinical programs in immunotherapy, anti-angiogenesis drug discovery, genomics, cell-based therapies, and bioinformatics. An NCI-designated Comprehensive Cancer Center, Moffitt is the third largest cancer center in the country, committed to excellence in patient care, research and education.

## **Requirements**

Candidates must be BC/BE, and fellowship trained in Medical Oncology / Hematology, experience / training in geriatric oncology. Salary and benefits are commensurate with prior training and experience.

The Cancer Center is comprised of a large ambulatory care facility, a 206-bed hospital, with a 36-bed blood and marrow transplant program, 14 state of the art operating suites, a 30 bed intensive care unit, a high volume screening program, and a strong basic science research facility. The Moffitt Research Institute is comprised of approximately 150 Principal Investigators, 58 laboratories, and 306,000 square feet of research space.

This position will design and conduct investigator-initiated trials targeting older cancer patients. A significant publishing activity is expected. This position will provide outpatient consultations in the SAOP clinic, inpatient rounding and medical oncology expertise in the field of geriatric oncology. Provide education and training to the University of South Florida fellows, residents, and students.
